

Food Lockers

BearSaver

Campground Food Storage

BearSaver Bear-Resistant Food Storage Lockers are rugged, high quality metal enclosures designed for safe and convenient food storage in campgrounds, picnic areas and trailheads. Our intermediate sized lockers are 15 (FS15) and 20 cubic feet, which are perfect for smaller campsites and trailheads. The 24 (FS24) and 30 (FS30) cu/ft lockers are large enough to hold an entire family's food supply including two large ice chests.

The **BearSaver** latching system uses a pocket style touch latch with double spring bolt actuation on its standard enclosures. Our pocket style, self-closing touch latch is composed of zinc plated steel components and hardware. A child safety release handle on the inside of the enclosure is provided. The design is very simple for users to operate but is beyond the capabilities of bears. It has a clean, attractive appearance and is ADA compliant in terms of height, reach and required pounds of operating force.

Model FS15

15 Cubic Foot Capacity Food Storage Locker

This small to intermediate sized food storage locker is perfect for trailheads, day use areas, tent cabin areas and small campsites. There is a center shelf built in to take advantage of the 15 cubic foot capacity. With provisions to bolt side-by-side, these lockers can easily be lined up for group usage.

Model FS20

20 Cubic Foot Capacity Food Storage Locker

This is an economically priced, intermediate sized food storage locker with enough capacity (20 cubic feet) for a regular sized cooler and room left over for a few dry goods. Primarily used in campsites, the FS20 can also be used at trailheads and public use areas.

Model FS24

24 Cubic Foot Capacity Food Storage Locker

One of most popular models, the FS24 has enough capacity (24 cubic feet) for a family who is camping for a week. There is room for two regular sized coolers and plenty of space left over for dry goods.

Always paying attention to detail we have added hooks on the ceiling of the locker for hanging bags of dry goods. These heavy-duty enclosures with easy to use, self-latching doors will provide years of reliable services in all weather conditions.

Model FS30

30 Cubic Foot Capacity Food Storage Locker

Our largest and best selling food storage locker, the FS30 has a full 30 cubic feet of interior space to accommodate large families on extended stays.

With the capacity to hold the largest of coolers and lots of dry provisions, this big locker removes the worries associated with keeping food in your car overnight.

FEATURES AND BENEFITS

Bearsaver Food Storage Lockers are designed for user friendly, accessible operation to ensure a consistent, high level of animal resistance. Large cupboard style doors ensure easy access for even the largest coolers. With enough room inside to open the cooler lids, the need for pulling heavy coolers out of the enclosure is eliminated, thus preventing back injuries. The doors can be opened with one hand and can be shut by simply swinging them closed. Constructed of 12-gauge galvanized steel to withstand the abuses of weather, animals and campers, the BearSaver Food Storage Locker is designed to last for years. Using UV resistant powder coating and zinc coated hardware, these enclosures are meant to withstand the harshest of environments.

MECHANICAL SPECIFICATIONS

All hinges, handles, striker plates and hardware are zinc coated for corrosion resistance. The door hinges are heavy-duty piano hinge material using stainless steel pins. The housing and doors are made from corrosion resistant 12-gauge steel and are finished using a textured powder coat process. The finish is resistant to humidity, salt spray, fog, ultraviolet rays, abrasion and chemicals. Standard powder coat colors are Forest Brown and Fir Green. Other colors, such as camel or tan for hot weather areas are available upon request. Reference our website for sizes and weights.
